HOPE for Animals

HOPE Community Cat Program

After years of hard-work, community cats are now safer in Fort Wayne! As of August 18th of this year, any cat found free-roaming outside can now be taken to Fort Wayne Animal Care and Control. There they decide if the cat qualifies for the [Community Cat Program](#).

For the cats that qualify, one of our coalition partners, Animal Care and Control, brings them to HOPE for Animals where we spay or neuter the cat, give them their rabies vaccine, microchip and an ear-tip. Thanks to your [support](#) we are able to provide these services to the cats. After the cats recover, our other coalition partner, the Allen County SPCA, picks them up and transports them back to their original home.

Since this program started over 200 cats have been pulled from the shelter and are now safe, healthier and not reproducing back in their outdoor homes. Volunteers and donations are needed to help continue this new life saving program. [Learn more](#).

Ear Infections

Did you know HOPE treats basic ear infections in our [wellness clinic](#)? Ear infections, in dogs, are common and most dogs suffer from this painful condition at sometime in their lives. Scratching and rubbing at the ear(s) and head shaking are common signs. You may also notice an abnormal odor from the ear or see redness or swelling. Most ear infections, in adults, are caused by bacteria and yeast. Call 260-420-7729 to learn more or schedule your appointment.

Transport Program

HOPE for Animals is located in Allen County, but through our [transport program](#) we are currently assisting 8 other counties in Northeast Indiana and one in Ohio.

By partnering up with area rescues and shelters, these counties now have a low-cost spay/neuter option and are able to help reduce pet overpopulation. The rescues and shelters coordinate the animals that need services, and HOPE meets them at a pre-determined location and transports them to the clinic. Following surgery, HOPE's transport driver delivers the now altered animals back to where they were picked up.

Thanks to generous [donors](#) support, we are able to continue helping Northeast Indiana's pets. To learn more or if your group wants to start a transport program in your county please contact us at 260-420-7729 or email KWilson@hfafw.org.

Amazon Wishlist

Want to help HOPE further our mission of reducing pet overpopulation but not sure what to do? Something as simple as donating an item off our [Amazon Wishlist](#) goes a long way to helping us achieve that mission.

All items off this list including cotton balls, wet cat food and bleach can purchased at any retail store and dropped off at the clinic or bought online and shipped here.
